ELSEVIER

**Lipids and Lipid Metabolism**

Vol. 1348, 1997

BIOCHIMICA ET BIOPHYSICA ACTA
BBA

# Contents

*Information for contributors* vii

*Preface* 1

## *Chapter IA*

*sn*-Glycerol-3-phosphate acyltransferase from *Escherichia coli*
*W.O. Wilkison and R.M. Bell (USA)* 3

## *Chapter IB*

Glycerol-3-phosphate acyltransferase in plants
*N. Murata and Y. Tasaka (Japan)* 10

## *Chapter IC*

Mammalian mitochondrial glycerol-3-phosphate acyltransferase
*L.K. Dircks and H.S. Sul (USA)* 17

## *Chapter II*

Dihydroxyacetone phosphate acyltransferase
*A.K. Hajra (USA)* 27

## *Chapter III*

Alkyl-dihydroxyacetonephosphate synthase
*H. Van den Bosch and E.C.J.M. De Vet (The Netherlands)* 35

## *Chapter IVA*

Phosphatidate phosphatases and diacylglycerol pyrophosphate phosphatases in *Saccharomyces cerevisiae* and *Escherichia coli*
*G.M. Carman (USA)* 45

## *Chapter IVB*

Phosphatidic acid phosphatase from mammalian tissues: discovery of channel-like proteins with unexpected functions
*H. Kanoh, M. Kai and I. Wada (Japan)* 56

## *Chapter VA*

Choline kinase from yeast
*S. Yamashita and K. Hosaka (Japan)* 63

## *Chapter VB*

Choline/ethanolamine kinase from mammalian tissues
*K. Ishidate (Japan)* 70

## *Chapter VI*

CTP:phosphocholine cytidylyltransferase
*C. Kent (USA)* 79

## *Chapter VII*

CTP:phosphoethanolamine cytidylyltransferase
*B.A. Bladergroen and L.M.G. Van Golde (The Netherlands)* 91

## *Chapter VIIIA*

CDP-choline:1,2-diacylglycerol cholinephosphotransferase
*C.R. McMaster and R.M. Bell (Canada, USA)* 100

## *Chapter VIIIB*

CDP-choline:alkylacetylglycerol cholinephosphotransferase catalyzes the final step in the de novo synthesis of platelet-activating factor
*F. Snyder (USA)* 111

## *Chapter IX*

CDP-ethanolamine:1,2-diacylglycerol ethanolaminephosphotransferase
*C.R. McMaster and R.M. Bell (Canada, USA)* 117

## Chapter X

Acyl-GPC and alkenyl/alkyl-GPC:acyl-CoA acyltransferases
*P.C. Choy, M. Skrzypczak, D. Lee and F.T. Jay (Canada)* 124

## Chapter XIA

The phospholipid methyltransferases in yeast
*M.I. Kanipes and S.A. Henry (USA)* 134

## Chapter XIB

Phosphatidylethanolamine *N*-methyltransferase from liver
*D.E. Vance, C.J. Walkey and Z. Cui (Canada, USA)* 142

## Chapter XII

Phosphatidylserine synthase I and II of mammalian cells
*O. Kuge and M. Nishijima (Japan)* 151

## Chapter XIIIA

CDP-diacylglycerol synthase of microorganisms
*W. Dowhan (USA)* 157

## Chapter XIIIB

CDP-diacylglycerol synthase from mammalian tissues
*A.M. Heacock and B.W. Agranoff (USA)* 166

## Chapter XIVA

Phosphatidylinositol synthase from yeast
*J.-i. Nikawa and S. Yamashita (Japan)* 173

## Chapter XIVB

Phosphatidylinositol synthase from mammalian tissues
*B. Antonsson (Switzerland)* 179

## Chapter XV

Phosphatidylglycerophosphate synthase from yeast
*S.A. Minskoff and M.L. Greenberg (USA)* 187

## Chapter XVIA

Cardiolipin synthase from *Escherichia coli*
*B.E. Tropp (USA)* 192

## Chapter XVIB

Cardiolipin synthase from yeast
*M. Schlame and M.L. Greenberg (Germany, USA)* 201

## Chapter XVIC

Cardiolipin synthase from mammalian mitochondria
*M. Schlame and K.Y. Hostetler (USA, Germany)* 207

## Chapter XVIIA

Phosphatidylserine synthase from bacteria
*K. Matsumoto (Japan)* 214

## Chapter XVIIB

Phosphatidylserine synthase from yeast
*S. Yamashita and J.-i. Nikawa (Japan)* 228

## Chapter XVIII

Phosphatidylserine decarboxylase
*D.R. Voelker (USA)* 236

## Chapter XIX

1L-*myo*-Inositol-1-phosphate synthase
*A.L. Majumder, M.D. Johnson and S.A. Henry (India, USA)* 245

*Information for Contributors* *vi*

## Regular papers

Cross-talk between secretory phospholipase $A_2$ and cytosolic phospholipase $A_2$ in rat renal mesangial cells
*A. Huwiler, G. Staudt, R.M. Kramer and J. Pfeilschifter (Switzerland, USA, Germany)* 257

Diacylglycerol partitioning and mixing in detergent micelles: relevance to enzyme kinetics
*C. Zhou and M.F. Roberts (USA)* 273
